Raltron Enhances Support for Medical Equipment Manufacturers

MIAMI – April 20, 2020 – Raltron, a global leader in high performance frequency management components and antenna products, has increased resources to support medical equipment manufacturers during the COVID-19 pandemic. Raltron has implemented strategies to prioritize operations and ensure facilities can meet the needs of medical customers. Raltron products are being used in life-saving medical equipment essential to the fight against COVID-19, including ventilators, patient monitoring equipment and more.

Currently, the Miami-based facility is at 100% capacity, while the Asian facilities are at 90% capacity. Raltron's crystal oscillators, crystal resonators and filters are primarily used in portable medical devices.

"Raltron is dedicated to supporting customers during this challenging time, particularly those serving the medical industry. We are working to streamline deliveries for our customers to meet increased demand, while ensuring the safety of our employees," said Ross Weiss, VP of Sales at Raltron. "We must all come together to support one another during this challenging time. Raltron is eager to do its part to help support the global supply chain."
